

## **For Allentown Pediatric & Adolescent Medicine Patients Who Have Tested POSITIVE for COVID-19**

Once you have been tested for COVID-19 disease you must **Isolate** until you have received your test results. **This is mandated by the Erie County Department of Health.** Household members and close contacts should self-quarantine while waiting for test results. If your test is negative or normal you no longer need to isolate and close contacts no longer need to quarantine.

Please follow the guidance for continued **mandatory isolation** if you test **positive** for COVID-19. Household members and close contacts are **mandated to Quarantine** for 14 days from the time of the last exposure to the positive COVID-19 person.

Please refer to the Erie County Department of Health of Health website for details regarding isolation, quarantine, and contact tracing.

Allentown Providers will be checking in with you on a regular basis and are available if you have questions.
